| 1. Notifications / Alerts ..... | 2 |
| Add Email Contact.....          | 2 |
| Add Telegram Contact .....      | 2 |

## 1. Notifications / Alerts

When you login you will land on the “Device Manager” screen. From the list of your devices click on the right side of the device item row. A menu will come up, select contact list.

### Add Email Contact

Type in new email address to add to email address list. Click add. Click save to leave page.

| Email List    |               |
|---------------|---------------|
| test@apex.com |               |
| Remove        |               |
| Add           | test@apex.com |

### Add Telegram Contact

Telegram uses chat\_ids which our server will manage once you register using your email address. So simply add the email address in this field as you would with an email contact.

Once you have done this. Send a telegram message to MLT\_Portal\_bot. The message must be the email address you added in the telegram contact list.

Then email [info@mltinverters.com](mailto:info@mltinverters.com) requesting to link your phone to that email contact. We will notify you when they are linked.

| Email List    |               |
|---------------|---------------|
| test@apex.com |               |
| Remove        |               |
| Add           | test@apex.com |

  

| Telegram List |               |
|---------------|---------------|
| test@apex.com |               |
| Remove        |               |
| Add           | test@apex.com |
